PRECISION TOOLS FOR HIGH-PERFORMANCE INDUSTRIES

YOUR TRUSTED PARTNER FOR COLD AND HOT FORMING EQUIPMENT

We are a highly specialized company in the manufacturing of tooling and forming processes, with particular expertise in the design and production of dies and punches. Thanks to our solid technical know-how and a reputation for reliability built over time, we have established a long presence both in the national and international markets. We offer high-precision solutions tailored to a wide range of industrial sectors, including automotive, aerospace, electrical, construction, wind and solar energy, as well as deep drawing and sheet metal blanking processes. Our unwavering commitment to excellence enables us to effectively meet the most complex needs, ensuring equality, reliability and innovation in every project.

Technology and traceability in line with industry 4.0 principles

Our company has fully embraced the principles of Industry 4.0, implementing advanced systems that enable seamless interconnection between machinery and dedicated software. This approach allows real-time monitoring of process parameters and ensures full traceability of every stage and timing of the production cycle, guaranteeing control, efficiency and quality.

Tailored quality and continuous customer focus

We deliver highly customized products, made with carefully selected raw materials and through an optimized production cycle, as certified by our ISO accreditations. Our after-sales service is built on ongoing communication with the customer, enabling continuous performance monitoring and accurate production evaluation, all with the goal of offering increasingly high-performing, tailor-made solutions.

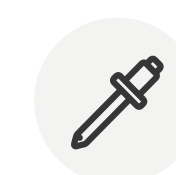

CUSTOM DIES AND PUNCHES FOR HIGH-PRECISION COLD FORMING

We manufacture cold forming dies in steel and hard metal (HM), ensuring high-quality standards. Thanks to a state-of-the-art machine fleet, we are able to guarantee extremely tight tolerances and maximum dimensional precision. The flexibility and efficiency of our facilities allow us to handle both large-scale production and single-unit orders, providing precise and customized solutions to meet every customer's needs.

PRECISION TOOLING FOR BLANKING AND DEEP DRAWING

DEEP DRAWING PLATES DIES AND PUNCHES

We manufacture precision tools for blanking and deep drawing, specializing in the production of steel and hard metal plates, dies and punches designed for blanking and deep drawing operations. Our tools find applications across a wide range of industrial sectors, from automotive to furniture. The use of advanced production technologies allows us to ensure high efficiency and consistent quality, both in large-scale production runs and single-piece manufacturing, responding flexibly to every customer requirement.

FLEXIBLE MANUFACTURING CAPACITY FOR EVERY INDUSTRY

**POWDER COMPACTION DIES
MANDRELS AND DIES FOR DRAWING
TOOLING FOR STAMPING AND ROLLING
ROLLERS FOR HOT DRAWING**

Thanks to our extensive and reliable production capacity, we are able to offer companies **optimized industrial solutions and equipment** for a wide range of applications and sectors. We operate with efficiency and flexibility, supplying both **small series and large production batches**, always focusing on quality and on-time delivery.

Our expertise and advanced technologies allow us to manufacture high-performance equipment in steel and hard metal, ensuring top-tier quality and efficiency.

OUR KNOW-HOW ***DELIVERING EXCELLENCE, EVERY TIME***

CUSTOMER-SPECIFIC ADVANCED DESIGN

Thanks to the use of cutting-edge software, we design tailor-made processes to ensure maximum customization, productivity and efficiency for each customer. Our team's solid experience enables us to identify the most suitable solution for specific requirements, managing every phase of the project with reliability and precision:

From the initial feasibility study to the manufacturing and delivery of the equipment, always within fast and controlled timelines.
